U.S. FOREST SERVICE
Ski Discovery is Located in
Beaverhead-Deerlodge
National Forest

CAUTION the **extreme terrain** served by the backside lifts is very steep, unpredictable, and ungroomed. While snow safety and avalanche mitigation efforts help reduce the risk of avalanches, avalanches and snowslides may occur at ski areas both inside and outside of the posted boundaries. Avalanches are an inherent risk of the sport due to the nature of snow and its application on steep mountain terrain. There may also be obstacles, rocks, cliffs, old fallen trees and snags. This is true double black diamond territory. Ski carefully and cautiously until you are familiar with this terrain. If you are going to ski trails marked double diamond (experts only) you must know how to self arrest. If you do not know this maneuver please contact our ski school or our ski patrol.
